

January 15, 2019

Dear Ayla,

Thank you so much for writing me back !

Here are the answers to your questions:

Spiny water fleas, they used to live in North America but they moved to the Great Lakes in 1984. They were moved from their natural habitat by accident, they got stuck on boats.

Spiny water fleas eat zooplankton and they only live up to 2 weeks.

When I grow up I am thinking about going to Cleveland State University (CSU). I would like to study volcanoes and do a lot of explosive projects. My favorite class in school right now is science. Over winter break I Christmas, for Christmas I got a foot tub a lot of makeup and a computer, and a lot of other stuff. This year I am going to study more and keep my grades up. Where I live it is very cold and snowy. My favorite seasons are spring and winter. I live in Ohio. Ohio's landscape is formed by plains, hills, plateaus and is also crisscrossed by streams and the Ohio river. We have both forest and farmland. Outside of school I have been doing a lot more studying and working harder.

Now here are some questions for you: Have you ever been to Ohio? What kind of phone do you have? What kind of cool stuff do they have in Massachusetts? What is your favorite food and favorite color?

Sincerely, Camya
